

## Tamiya Mazda RX-7 R1 Window Masks

Print them out on paper and cut then test for scale, they should print correct.  
If correct, stick Tamiya 18mm/40mm wide tape over the top and cut them out,  
peel off paper and fix to inside of clear window unit,  
then spray with Semi-gloss black, (airbrushing is best) remembering to apply in light  
coats to stop paint bleeding under masks.
